

# Introduction to IoT

Pavel Genevski & Vladimir Savchenko - SAP Labs Bulgaria  
February, 2022

# Teachers

---

Pavel Genevski

Vladimir Savchenko

# Administrative Q&A

---

## **Кога?**

Четвъртък от 17:15 до 21:00

## **Къде?**

MS Teams

## **Как да минем?**

Защита на групов проект + индивидуални впечатления

---

# Let's get started!

# Over 20 billion connected devices

Insights that empower you to understand IoT markets

## Total number of device connections (incl. Non-IoT)

20.0Bn in 2019– expected to grow 13% to 41.2Bn in 2025

Xx% = Compound Annual Growth Rate (CAGR)

Note: Non-IoT includes all mobile phones, tablets, PCs, laptops, and fixed line phones. IoT includes all consumer and B2B devices connected – see IoT break-down for further details

Source: <https://iot-analytics.com>

# How did we get here?

## Hardware is now ...

Cheaper

Smaller

More connected

Less power hungry

Easier to develop

## Ecosystem

More tools & knowledge

More investment

More opportunities

# What is IoT?

## Physical

Sensors, Actuators

## Connected

WiFi, Bluetooth, Cellular, LPWAN ...

## Programmable

Arduino, C/C++, Python, Java, Assembly ..  
(Atmel, **Espressif**, TI, Microchip, MIPS, ARM ...)

```
/**
 * Test led: Arduino uno
 */

#include "Arduino.h"

int redPin = 9;
int greenPin = 10;
int bluePin = 11;

void setColor(int red, int green, int blue)
{
    red = 255 - red;
    green = 255 - green;
    blue = 255 - blue;
}

void setup() {
    Serial.begin(9600);
    Serial.println("Setup");
    pinMode(redPin, OUTPUT);
    pinMode(greenPin, OUTPUT);
    pinMode(bluePin, OUTPUT);
}
```

# Industrial vs Consumer IoT

---

## Industrial IoT

**Drivers:** cost and risk reduction, business insights

**Challenges:** compatibility, compliance, reliability, security

## Consumer IoT

**Drivers:** coolness, convenience, health, curiosity

**Challenges:** UX, hype vs value, time to market, some privacy and security

# Industrial IoT examples

## ***Remote maintenance & management***

**Energy:** Solar & wind power

**Construction:** Pipelines, bridges, buildings

**Agriculture:** Soil properties, crop health ...

## **Smart vehicles**

Remote and continuous metering of cargo temperature, truck position and health ...

Source: <http://inmolecular.com/index.php/cold-chain-monitoring-solution/>

# Consumer IoT examples

## Personal productivity & fashion

Smart phones & watches

Fitness & sleep trackers

Professional sports gadgets

## Home Automation

*Smart locks, Bulbs, TVs*

Baby monitors

*Appliances health monitors*

<https://c.slashgear.com/wp-content/uploads/2011/12/NO-4.jpg>

# What?

# Course assignment

## Objective

Try to make something useful

No idea is too brave!

Learn new things

## Examples

Smart beehive, waste bin

Smart plant pot

You name it ...😊

Made in  
FMI 😊

Source: <https://www.smartbin.com/markets/level-sensor-general-waste-recyclables/>

# How?

# IoT development platforms

---

## Bare metal

**SDK:** Espressif, NXP, TI, Atmel, Microchip ...

**Arduino:** Atmel, **ESP32 (we will use this one)**

## Linux

Raspberry PI, Beaglebone ...

## Android & iOS

Phones, Wearables, TVs ...

# Sensors & Actuators

## Sensors

- Touch, movement, force, location, acceleration
- Light, sound, video, sound
- Temperature, humidity, moisture, pressure
- Pressure, proximity, gas detection
- Liquid level, flow, magnetic field (hall), radiation
- Fingerprint, heart rate ...

## Actuators

- Lights, sound, movement, heat

# Connectivity

## Long range

LoRaWAN, NB-IoT, 3G/GPRS

## Medium range

ZigBee, WiFi

## Short range

Bluetooth, NFC/RFiD

## Wired

Ethernet, RS-485, 4-20 mA ...

Source: <http://hitlistsofts.blogspot.bg/2015/05/difference-between-gsm-gprs-edge-3g.html>

# What else?

## Power management

Batteries, sleep modes ...

## Security & Device management

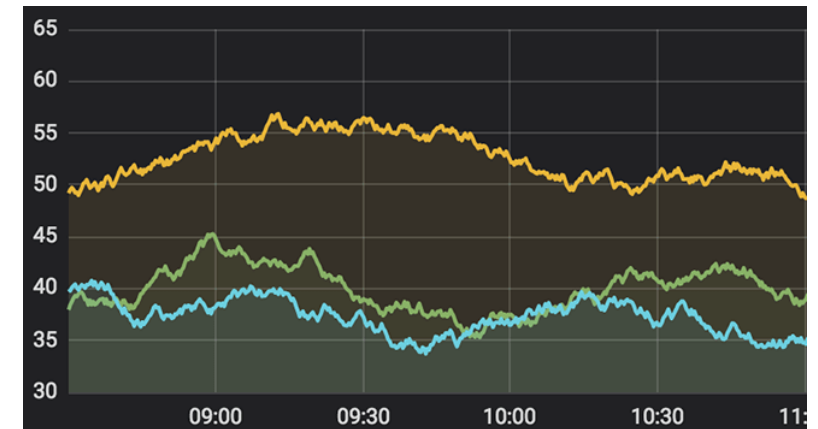

Authentication, Onboarding ...

Monitoring

## Data management

Data transport & storage

Processing and visualization
